MEMORANDUM FOR: [REDACTED]

SUBJECT : Notes on 26 May 1972 Meeting of MC&G Working Group

25X1

1. [REDACTED] Acting Chairman, informed the working group of my COMIREX Staff assignment and that [REDACTED] would continue to attend.

25X1

25X1NRO

2. [REDACTED] reported that Mission 1116 provided 228,000 square nautical miles of unique coverage responsive to MC&G priority requirements, and 940,000 square nautical miles of priority recoverage. The requirements for Mission 1117 were not materially changed from those of Mission 1116, except for requested emphasis on the higher priority areas when feasible. General Penney is stressing map production on the most important military areas.

25X1

3. I passed on the information that [REDACTED] had given me about the status of 1117. With the reduced time in orbit, all four MC&G priorities had been opened up for collection. [REDACTED] indicated that nine percent of the take of the first bucket on the previous night had been used for MC&G requirements, and he felt that some 40-50 percent of the entire mission might be expended on MC&G. [REDACTED] of NRO noted the continuing need for collecting on the SALT requirements and had a lower estimate for the final figure. Of the 70 percent of the film that was left, he felt that 20 percent would be expended on MC&G requirements, and the total MC&G take would run about 25 percent. (The figure that [REDACTED] got from NRO today was 32.58 percent of the total mission.)
